1. Friday Charity Ride

Due to a major funeral taking place in the Pemberton Sports Club on Friday afternoon, we have moved the Service Park to the Hotel Car Park, changed the route to the Start.

The Start will move to Pump Hill Road at the bottom of the Skate Board Park. Out of respect, if the rally car noise becomes too loud for those inside the Sports Club, we may need to stop for a while. We are trying to make contact with the family to ensure we don't interrupt what they need to do. See attached map from Service Park to Stage Start.

We would appreciate if there was no "full revs" starts.

Money raised from the Charity Ride Day will go towards installing a PA System into the Northcliffe Town Hall.

2. RallySafe

All competitors, MUST have a Rallysafe wiring kit fitted to their vehicle. It must be connected to a constant 12V power source ie one that does not turn off with the ignition. Please confirm that you have the required wiring intact and that the LED in the yellow power lead is lit.

If you do not have a kit already installed in your vehicle please contact us immediately
